PRESS RELEASE

Serendipity Megarip 8.0 announced.

SYDNEY, Australia – November 26, 2019 - Serendipity Software today announced version 8.0 of Megarip, a major update to the software that includes many new features and enhancements that will benefit new and existing customers alike.

"Megarip version 8.0 adds features to ensure uninterrupted productivity" said Peter Skarpetis, Serendipity Software's Chief Executive Officer.

It includes an improved configuration database that can automatically recover from crashes, undelete settings and revert database items to previous versions.

Megarip version 8.0 adds configuration intelligence that automatically repairs configurations when items are deleted or corrupted. Additionally users are warned when an action, such as delete, would make a configuration unusable.

Megarip version 8.0 adds support for the EPSON SC-P9500 series of printers.

Megarip version 8.0 adds support for the HP DesignJet Z9 series of printers.

For more information on the new features and enhancements in Serendipity Megarip 8.0 see the release notes, available on the Serendipity Software website.
