

PRESS RELEASE

Serendipity Veripress 8.0 announced.

SYDNEY, Australia – November 26, 2019 - Serendipity Software today announced version 8.0 of Veripress, a major update to the software that includes many new features and enhancements that will benefit new and existing customers alike.

“Veripress version 8.0 adds features to ensure uninterrupted productivity” said Peter Skarpetis, Serendipity Software's Chief Executive Officer.

It includes an improved configuration database that can automatically recover from crashes, undelete settings and revert database items to previous versions.

Veripress version 8.0 adds configuration intelligence that automatically repairs configurations when items are deleted or corrupted. Additionally users are warned when an action, such as delete, would make a configuration unusable.

For more information on the new features and enhancements in Serendipity Veripress 8.0 see the release notes, available on the Serendipity Software website.
