PRESS RELEASE

Serendipity Veripress 9.0 announced

SYDNEY, Australia – March 3rd, 2022 – Serendipity Software today announced version 9.0 of Veripress, a major update to the software that includes many new features and enhancements of benefit to new and existing customers alike.

"Veripress version 9.0 adds dark mode support allowing better integration of the user interface with the operating system look and feel" said Peter Skarpetis, Serendipity Software's Chief Executive Officer.

Veripress version 9.0 adds one-touch Screening simulation to the SoftProof application. This allows the user to quickly see the result of angle / frequency combinations and to detect any artefacts that might occur during printing.

Veripress version 9.0 adds transparency support to the processing pipeline.

Veripress version 9.0 introduces support for SVG files.

Veripress version 9.0 adds support for N-Colour Calcheck charts enabling the user to configure sophisticated colour verification pipelines.

Veripress version 9.0 improves error reporting by introducing a log level for each error message allowing the user to filter error messages by severity. Additionally critical errors messages and warnings are colour coded further enhancing the visibility of these messages.

For more information on the new features and enhancements in Serendipity Veripress 9.0 see the release notes, available on the [Serendipity Software website](https://www.serendipity-software.com.au).
